New Relic is a software analytics company that makes sense of billions of metrics about millions of applications in real time. New Relic's comprehensive SaaS-based solution provides one powerful interface for web and native mobile applications and consolidates the performance monitoring data for any chosen technology in an environment. Thousands of active accounts use New Relic's cloud solution every day to optimize more than 690 billion metrics per day across more than four million applications. New Relic is pioneering a new category called Software Analytics. In March 2014 New Relic introduced New Relic Insights, a real-time analytics platform that allows companies to tap directly into the billions of real-time metrics from inside their software to provide actionable answers to their most important business questions.

### Brief History

Lew Cirne founded New Relic in 2008 to provide an advanced application performance management (APM) solution to businesses of any size through a software-as-a-service offering. Today, New Relic has expanded its software analytics offering to make sense of billions of data points about millions of applications in real time. New Relic offers one powerful interface for web and native mobile applications and consolidates the performance monitoring data for any chosen technology. In April 2014, the company announced a \$100 million investment round led by BlackRock, Inc. and Passport Capital, LLC with participation from T. Rowe Price Associates, Inc. and Wellington Management. Current investors include: Allen & Company, Benchmark Capital, BlackRock, Dragoneer Investment Group, Insight Venture Partners, Passport Capital, Wellington Management, T. Rowe Price Associates, Tenaya Capital and Trinity Ventures.
