what is C+D

The C+D - Craft+Design - Conference Table program brings an artisanal focus back into the boardroom, while addressing the various connectivity needs of the contemporary workplace.

Thoughtful craftsmanship comes into play with the materials in the layered top and in the details of its different edge profiles and various leg options that support its large format.

Clever wire management and power are integrated to satisfy all the connectivity needs that versatile workspaces demand.

The C+D's numerous elements, with details that balance artisan craft and function, allow companies to customize the conference tables to fit their own distinct identity.

C&D, Craft & Design, is a collection of tables designed by Mario Ruiz. These tables are available within the Custom Wood catalog, which also features Boardroom Credenzas that compliment the tables with a similar finish offering.
