

How to connect to Vlab computers

MAC users must download Microsoft Remote Desktop from the Appstore to follow these steps

Browser (Firefox/Chrome)

1. Go to <http://support.cs.fiu.edu/vlab/>
2. Click on one of the available computers (blue link) to download the remote desktop settings file.

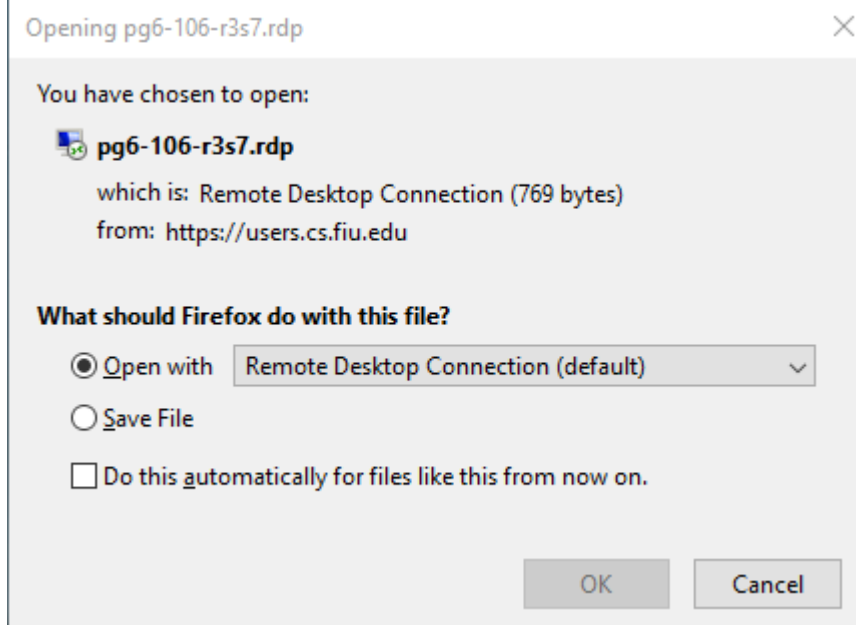

The screenshot shows a web browser window with the address bar displaying support.cs.fiu.edu/vlab/. The page content includes a heading "Status of lab systems", a timestamp "updated Wed Jul 29 14:50:55 EDT 2020", a link to "Instructions on how to use the RDP gateway system", and a status line "Hosts available 91, Not in use 91 In use 0". Below this is a grid of 50 blue hyperlinks for lab systems, organized in 5 columns and 10 rows. The first 50 links are for jcc1-01 through jcc1-50, and the last 10 links are for pg6-102-01 through pg6-106-r3s7.

3. How to launch the remote desktop file according to your browser:

- 3.1. **Firefox** should prompt you to launch the Remote Desktop Connection right after clicking an available computer, click **OK**.

- 3.2. In **Chrome**, the file will download and show its progress at the bottom of the browser as shown below. Click it once it has finished downloading to launch the next step.
