Will adding 'django.middleware.gzip.GZipMiddleware' to 'MIDDLEWARE_CLASSES' will solve this task?

<https://docs.djangoproject.com/en/1.3/ref/middleware/#module-django.middleware.gzip>

01/23/2012 01:21 pm - Benny Weingarten

Could be. I am not proficient enough in Django to know how to implement this.

From what I've seen in the code, the API is implemented via the django-piston library. I don't know where is the correct place to add the 'gzip_page()' directive from the GZipMiddleware library.

I think this was solved already. the response size is 29.12 KB, and it is gzipped.
