

Mobile Site 1.0 - Bug # 3445: ipanel.scout - Image path dirict to web.scout instead for ipanel.scout

Status:	Closed	Priority:	Low
Author:	Shlomi Lanton	Category:	
Created:	09/24/2012	Assignee:	Idan Geva
Updated:	10/01/2012	Due Date::	
Description:	When I get to an image question, the image does not displayed. When I look at the path of the image I saw that it's http://web.scout.co.il/files/survey/media/%D7%9E%D7%A1%D7%9A_%D7%94%D7%95%D7%93%D7%A2%D7%94700-900.jpg obviously that this is incorrect because this is ipanel.scout and because of it the link should be http://ipanel.scout.co.il/files/survey/media/%D7%9E%D7%A1%D7%9A_%D7%94%D7%95%D7%93%D7%A2%D7%94700-900.jpg When I use this path (ipanel.scout) with I can see the image. you can use this link to see this issue: http://mobile.ipanel.co.il/index.php?web&db=rafi_test_mobile_demo&lng=1 Eugene I think that this is your issue, but if not please respond and redirect it to Nadav

- Status changed from Assigned to Feedback

I fixed it. it was 2 values that referred to web.scout instead of ipanel.scout in
var/www/mobile.ipanel.co.il/htdocs/templates/Questions/10_Video.php, in lines 15 and 28.

NADAV - please insert this modification to your uploading mechanism so it won't override this value in every update.

you may close this issue upon execution of the new modification script in respective values.

```

This is part of my log file. You can see that I returned path from <http://ipanel.scout.co.il> :-)

- Status changed from Feedback to Resolved

That's resolved no?

09/30/2012 09:52 am - Shlomi Lanton

- *Priority changed from High to Low*

- *Status changed from Resolved to Feedback*

For now it's fixed, but you need to make sure to not create this issue again when updating ipanel.scout

After reading this you can close this issue :-)

10/01/2012 11:57 am - Nadav Avidan

I've added the root paths to be dynamic. no need to be worried about overwriting. each server will get its own root path.

- *Status changed from Feedback to Closed*

OK.
